# THE FEARLESS TRIPLETS

Meet Lien, Sien and Fien. They're triplets. They're smart, fearless and dangerously out of control.

Since their parents are much too selfish to pay attention to them, the girls have become angry troublemakers. They lie, they steal and they love creating problems for other people. Now the police have come to arrest the girls for setting their school on fire.

Because they're young, they're spared a prison sentence. Instead, they're placed in the care of Dr. Vandekerckhove and his assistant Lucy, in their institution for troubled children. At first, the girls think they've landed in a vacation paradise. After all, it's clean, there's plenty of food, and they're even given special candies each night before they go to bed. They've never had such a good night's sleep. That's because the candies are filled with drugs.

One night, Sien decides to steal her sisters' candy, so there's none left for them. Without the drugs, Lien and Fien wake up in the middle of the night, slip out of bed, and snoop around the institution. What they find in the doctor's office scares them to death. That's when they stumble across the evil mask of the devil. That's when they spy on the doctor while he operates on one of the boys and removes his kidney. That's when they find the paper with the plan to operate on the triplets and steal their hearts as a sacrifice to the devil.

The sisters rush back to the bedroom, wake Sien and devise an escape plan. The doctor finds out what they're up to and almost catches them in the act but they escape with only seconds to spare. They're on the run. They know there's only one person in the whole world who might believe their story. The only person who's ever seen some good in them. Their teacher. After sneaking into her house in the middle of the night, the teacher takes them to meet Diana, the owner of a strange antique shop. Diana has magical powers. She knows that if the Doctor succeeds with his evil plan, the devil will reign for another hundred years.

She devises a desperate plan but it means that the triplets must risk their lives to defeat the Doctor. She tells them that they need to break into the laboratory at the zoo and steal a rare vial of snake blood. They get caught in the act by the guards but start smashing everything in sight in order to avoid capture.

Next, they must lure the Doctor to an old water mill. The final fight between the Doctor and the triplets is an all out battle. Human sacrifice and fire are the only way to win this war. THE FEARLESS TRIPLETS is a nail biting adventure, filled with danger and suspense at every turn.
